

Molylub FormDraw TDN

(Art. No E9010)

mineral oil-based, non-water miscible deep drawing metalworking oil

Description: Preparation based on mineral oil hydrocarbons with a low aromatic content, polar lubricity improvers, chlorinated paraffins as well as anticorrosion additives and stabilising agents.

| | | |
|-----------------------------------|---------------------------------------|-------------------------------|
| Technical characteristics: | Appearance: | clear, light brown liquid |
| | Density at 15 °C: | 1040 kg/m ³ |
| | Kin. viscosity at 40 °C: | approx. 90 mm ² /s |
| | Flash point (COC/DIN EN ISO 2592): | min. 180 °C |
| | Pour point: | < -10 °C |
| | Copper corrosion (3 h; 100 °C): | 1 a - no discolouration |

Application: The product is used undiluted for heavy chipforming and chipless machining of ferrous and non-ferrous materials. Deep drawing of difficult steels such as high nickel/chromium alloys, titanium alloys, as well as for aluminium alloys. Cold-forming of hard to handle materials such as stainless steels and nickel/chrome alloys, Cold-forming of "hard to handle" materials such as stainless steels and nickel/chrome alloys

Benefits :

- Designed for heavy duty operations
- Provides excellent tool life
- Reduce part galling and increase anti-wear capabilities
